

STEERING PUMPS

LUK Power Steering Pumps

AUTOMOTIVE

HYDRAULICS

LUK Steering Pumps have a proven track record in line haul truck applications, with displacements from idle flow rates of 9 litres per minute through to 18.5 litres per minute and pressure capabilities up to 150 Bar. The steering pumps have an operating temperature range from -40°C to 135°C. The balanced design result in a reduction of radial shaft loads with the ultimate benefit of a longer service life.

Having a lightweight design for low tare weights LUK Steering Pumps are the most cost effective in their class. Insist on LUK for superior performance and low maintenance.
