

## Coolflow Cooling Solutions

### Why your trucks needs a COOLFLOW fluid cooler

- Today's trucks run hot with higher engine bay temperatures.
- Hose and seal life is extended.
- Less downtime due to heat related fluid problems.
- Can be used to cool engine fuel, differential and gearbox oils.
- Significant improvement in fuel economy can be achieved in certain circumstances

### What's special about the Hydrosteer COOLFLOW

- Low back pressure design.
- Mechanically strong, resists stone damage.  
Easy mounting, almost anywhere.
- No clog design, can run in dusty areas.
- Available in a range of standard lengths.
- Custom lengths available for special applications.

(Typical Fuel Cooler Installation)
